

## **Slide Mirror series**

Fascinating new mirror series by designer Marc Th. van der Voorn for DeKnutd mirrors (BE). The construction is it's best detail. The mirror seems to float on the wall. The mirror slides through the tray, covering the mounting points. A sophisticated wall mirror that will embellish your hallway, bathroom and even your living room.

Have a look at the 'making of' video: <http://vimeo.com/43658935>

### **Slide Circle**

This mirror series was designed by the Dutch designer Marc Th. van der Voorn. Each time a bended metal plate is provided with an opening in which the mirror can slide. Hence also the name "Slide". 2764.251: An L-shaped metal form offers enough surface to put little items on. The contemporary and very simple design looks tight and fits perfectly in a modern interior. Those who love simplicity and functionality will appreciate this mirror for sure. The black volume of the metal cuts right through the soft round mirror shape. Bent metal, finished in a black powder coating with a textured matt surface.

### **Slide Double**

This mirror series was designed by the Dutch designer Marc Th. van der Voorn. Each time a bent metal plate is provided with an opening in which the mirror can slide. Hence also the name "Slide". 2763.151 is the model consisting of a u-shaped metal form offering sufficient surface to put small items on. The contemporary and very simple design looks tight and fits perfectly in a modern interior. Those who love simplicity and functionality will appreciate this mirror for sure. The mirror can be fixed to the wall in two different directions, placing the mirror either on the left or on the right side. Bent metal, finished in a black powder coating with a textured matt surface.

### **Slide Standing**

This mirror series was designed by the Dutch designer Marc Th. van der Voorn. Each time a bent metal plate is provided with an opening in which the mirror can slide. Hence also the name "Slide". 2765.351: An L-shaped metal foot constitutes the solid base for this very elegant standing mirror. The mirror as such "slides" in a groove on top of the foot and rests on soft protection caps. Also the foot itself is provided with protective caps at the bottom. The contemporary and very simple design looks tight and fits perfectly in a modern interior. Those who love simplicity and functionality will appreciate this mirror for sure. Bent metal, finished in a black powder coating with a textured matt surface.

## **About Marc Th. Van der Voorn**

Achievable product design

Marc Th. van der Voorn (born in 1974) graduated from Minerva Art Academy, Groningen (NL) in 2001, with a major in interior design. That same year, he founded AAN-UIT Lighting Design. This was the start of his career as an independent designer.

Nowadays he works for brands like Odesi, neXtime, DeKnudt Mirrors and Spoinq, aiming for achievable product design.
